

Complete Controls Smart Actuator II™

Electronic Control System for Sailboats

Easily upgrade your sailboats mechanical controls with the Glendinning Smart Actuator II™ electronic control system, supplied as an easy to fit kit that will give you finger tip, precise control of your engines shift and throttle functions.

The latest CANbus technology ensures a simple installation and set-up, and where the only choice to make is whether you require a control handle for port or starboard side mounting on your boats steering binnacle or through a bulkhead.

Never before has it been so easy you order a complete control system with everything required for an installation on most boats included in a complete kit under one single part number.

- **COMPLETE "UPGRADE" KIT** - for easy replacement of all traditional mechanical shift and throttle controls.
- **PRECISE and INTUITIVE OPERATION** - finger tip control of your engines shift and throttle function.
- **LATEST CANBUS TECHNOLOGY** - for easy installation and set up.
- **SINGLE ENGINE / MULTI STATION CAPABILITY** - keypad to access throttle only mode and for station transfer (for twin station applications).
